ABOUT ME

Aspiring Software Developer with knowledge of MERN Stack and Python. Familiar with software development workflows and collaborative project environments. Possess strong communication, problem-solving, and planning skills with a passion for building user-focused solutions. Seeking an entry-level opportunity to learn, grow, and contribute to innovative technology projects.

EDUCATION

Master of Computer Applications 2024 - Present

Jagannath Community College, New Delhi

Bachelor of Computer Applications 2021 - 2024

Lingaya's Lalita Devi Institute of Management & Sciences, IPU

SUMMER TRAINING

Code With Harry

Data Science Training

Currently pursuing Data Science training covering Python, data analysis, and machine learning fundamentals. 2025 - Present

CodSoft

Web Development Intern

Developed a responsive web project as part of the internship program. June - July 2023

SKILLS

Languages	Frontend	Backend	Database	Libraries	Tools
- C Programming - JavaScript - Python	- HTML - CSS - React.js	- Node.js - Express.js	MongoDB	- Numpy - Pandas - OpenCV - Matplotlib	GitHub

PROJECTS

StockFusion – MERN Stack

- Built a full-stack stock trading web application using MongoDB, Express.js, React, and Node.js enabling users to buy, sell, and track stock investments.
- Designed and implemented RESTful APIs for handling stock transactions, user authentication, and portfolio management.
- Maintained detailed sell history and transaction logs for transparency and tracking.

Face Recognition Attendance System - Python | OpenCV | Haar Cascade

- Developed a real-time face recognition attendance system using Python and OpenCV for automated student attendance tracking.
- Implemented Haar Cascade classifiers to detect and recognize faces from live camera feeds.
- Built a dataset collection and training pipeline to improve face recognition accuracy.

Velora – AI Integrated Social Media Platform

- Built a scalable social media web application using MERN stack supporting posts, stories, messaging, profile management, and user discovery.
- Integrated Grok AI chatbot assistant for intelligent user interaction and query handling.
- Developed REST APIs for authentication, chat, and content management with MongoDB database integration.
